No, I think that we want to present our screening technology matrix. This will be the initial discussion. I think there will be follow-on discussions. We'll discuss the TZW issue...not sure what the issue is – but let's discuss it. We can also discuss the LWG RALs memo.

**Subject:** Status of Preparation for April 1 FS Technical Meeting

Kristine,

This is a reminder that according to the latest version of the FS Revision Process Matrix the EPA was to provide the LWG with a description of EPA's proposed technology application changes or concerns (Issues 2.4 through 2.8), additional information on draft FS TZW impact analysis concerns (Issue 3.7), and any questions or concerns about LWG's RALs memo (Issue 3.8) by last Tuesday (25-Mar-14). This information is necessary for the LWG to prepare for the technology application and evaluation discussions and the TZW area and SMA revisions meeting scheduled for next Tuesday (1-Apr-14). Please provide an updated date for us to use in the Revision Process Matrix. Also, since the LWG technical team will not have adequate time to fully review this information before next Tuesday's technical meeting, do you recommend altering the agenda for this meeting?

Thanks,

Jim McKenna
